VEDANT GADEKAR

Full Stack Developer | Cloud & AI Enthusiast

9075022638 | vedantgadekar06@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

High-energy, results-oriented Full Stack Developer and Computer Science Engineering student with a passion for building highly scalable web services and AI modernization initiatives. Proven ability to operate with an agile mentality, consistently driving decisions and owning outcomes in fast-paced environments. Strong foundation in Back-End Web Development, Data Analysis, and Problem Solving, supplemented by active learning in GenAI, Prompt Engineering, and cloud infrastructure. Adept at translating AI innovation into business impact and communicating with clarity to support cross-functional team goals.

TECHNICAL SKILLS & CORE COMPETENCIES

Programming & Architecture: Java (EE), Object-Oriented Design (OOD), Service-Oriented Architecture (SOA), Shell Scripting.

Web & Cloud Technologies: Back-End Web Development, React (Front-End), AWS SaaS Infrastructure, CI/CD DevOps, Distributed Systems.

Data & AI Modernization: Data Analysis, Prompt Engineering, LLMs, GenAI tools, Relational (SQL) & NoSQL Databases, Snowflake (Concepts).

Engineering Toolchains: Unit Testing, Test-Driven Development (TDD), Functional & Performance Testing, System Debugging.

Professional Attributes: Agile iterations (80/20 rule), Cross-functional Collaboration, Customer-Focused Trade-offs, Continuous Learning & Discipline.

RELEVANT PROJECTS & EXPERIENCE

Employee Management System | GitHub Repository

Academic/Personal Project

- **Backend Services:** Developed a robust, secure RESTful API using Java and OOD principles to manage employee records, department structures, and roles.
- **Database Integration:** Designed a relational database schema (SQL) with efficient queries, ensuring transactional consistency and data integrity.
- **Frontend Dashboard:** Constructed an intuitive administrative dashboard in React to search, filter, and modify records in real-time.

Smart Student Tracker | GitHub Repository

Academic/Personal Project

- **Full-Stack Architecture:** Engineered a web application using React and a Java back-end to track student attendance, performance trends, and metrics.
- **Data Analytics & UI:** Integrated charting components to visualize academic progress patterns and identify students needing attention.
- **Quality Assurance:** Conducted unit and system testing using test-driven development methodologies to deliver a highly reliable product.

CERTIFICATIONS & SPECIALIZED TRAINING

- Tata GenAI Powered Data Analytics Job Simulation
- Prompt Engineering for Everyone
- AI Foundations
- AWS Certifications
- Deloitte Australia – Data Analytics Job Simulation

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science — **Pursuing**

Sant Gadge Baba Amravati University, Amravati, Maharashtra

XII (Maharashtra State Board) — **82.8 %**

X (Maharashtra State Board) — **86 %**
